EDUCATION

B.Tech in Artificial intelligence and Data Science,
Anjuman College of Engineering and technology
2023-2027

08/2023 – Present
Nagpur

PROFILE

AI and Data Science student seeking a Data Science or Data Analytics internship where I can apply my skills in Python, SQL, data analysis, and dashboard development to transform data into meaningful insights while gaining real-world experience.

PROFESSIONAL EXPERIENCE

Co-Founder/ Trainee/Data Analyst, Codeflux Company
• Managed analytics, growth strategies, and tech branding.
• Conducted 17+ workshops for students, professionals, and non-professionals on AI/ML tools.
• Mentor peers in technical projects and promote collaborative learning.

04/2025 – 12/2025

Intern, NU Intelligence Nagpur
• Gained hands-on training in Python for machine learning applications
• Implemented algorithms for supervised and unsupervised learning
• Worked on data preprocessing, cleaning, and visualization for model building
• Strengthened skills in applying ML techniques to real-world datasets

01/2025 – 02/2025
Nagpur

SKILLS

MySQL		Data Analysis	
Data Cleaning		Microsoft Excel	
Power BI (Data Visualization)		Python	
YoloV8 Model Training		Machine Learning	
TensorFlow		Pandas	
NumPy			

CERTIFICATES

• Tata - Data Visualisation: Empowering Business with Effective Insights Job Simulation ↗	• Deloitte Australia - Data Analytics Job Simulation ↗	• GeeksforGeeks SQL-Skill up ↗	• Python for Data Science ↗
---	--	--	---

AWARDS

University Ranker 1 (Recognized for academic excellence with 8.13 SGPA),
Rashtrasant Tukadoji Maharaj Nagpur University

2025

PROJECTS

E-Commerce Sales Performance Dashboard (MySQL + Power BI)2025

- Analyzed sales data to uncover revenue trends, product performance and customer behavior.
- Created a clean, visually compelling dashboard for business decision-making.
- Highlighted insights like top-selling categories, profit contributors and seasonal patterns.

Decision Tree-Based Reflection Agent

- Developed a deterministic decision tree-based behavioral reflection system with structured branching logic and signal-based state tracking.
- Tech Stack- Python, JSON, Decision Trees

Crypto SIP User Behavior & Retention Dashboard2026

- Simulated a dataset of 500 users for crypto SIP investments
- Analyzed user retention, drop-off patterns, and investment behavior
- Built a Power BI dashboard to track engagement and growth metrics

CareerAI: ML-Powered Career Counseling Platform for PCM Students2026

Developing a hybrid machine learning-based recommendation system that analyzes academic performance, aptitude, and interests to predict suitable technical career paths and generate personalized career roadmaps using conversational AI.

Quick-Commerce-Data-Scraping-Analysis2026

- Collected haircare product data from Blinkit, Zepto, and Swiggy Instamart across 5 Bangalore pin codes.
- Cleaned and structured raw data.
- Prepared an analysis-ready dataset to compare pricing, discounts, stock status, and brand availability.

AI-Financial-Market-Data-Analysis

Performed exploratory data analysis on financial datasets to uncover stock trends, event impacts, and AI-driven market insights using Python and visualization tools.

Women Safety Project, (ongoing)2026

Built a machine learning–based real time threat detection system to enhance women’s safety by detecting risks and enabling quick alerts.

Synthetic-Data-Genration

Created a Python-based system to generate realistic synthetic datasets for machine learning experiments, testing, and privacy-preserving analytics.
